

## NIGHT-LITE PRO

MODELS: NL 7.5 - NL 8

### LIGHT-POWER-CUSTOMIZED

Is light your primary concern, but auxiliary power would come in handy from time to time? Look to the Night-Lite PRO series.

**Light.** 150 lumens per lamp. **Best in Class.**

**Power.** Up to 8 kw generators. **Supports Peripheral Tools.**

**Customized.** Available in Standard, International, Arctic Special and CSA-Approved packages. **Tailored Solutions.**

## MAXI-LITE

MODELS: ML 7.5 - ML 8 - ML 15 - ML 20

### MORE POWER-LONG RUNTIME-STABILITY

Need more power or a longer runtime than the Night-Lite PRO series can provide? Then the Maxi-Lite series is ideal.

**Power.** Up to 20 kw generators. **Supports More Tools.**

**Runtime.** 50-gallon fuel capacity for 100 hours of runtime. **Up to 4 Days.**

**Stability.** Wider body design and 4-point stabilization system. **Better Off-Road Towing and Setup.**

\*Available in Standard, International, Arctic Special and CSA-Approved customized packages.

## POWER SERIES

MODELS: ML 20 EX - ML 30 EX - ML 40 EX

### MOST POWER-LONGEST RUNTIME-STORAGE

When auxiliary power is your primary concern – and light is a secondary need – the Power Series towers are the ideal choice.

**Power.** 20 to 40 kw generators. **Supports Your Power Needs.**

**Runtime.** 135-gallon fuel capacity for up to 135 hours of runtime. **More than 5 Days.**

**Storage.** Available space within chassis. **Secure Light Fixtures and Peripheral Equipment.**

## V SERIES

VERTICAL TOWER

### COMPACT-EASY SETUP-FLEXIBLE

Currently available on the Night-Lite PRO series – and soon to be available on other models – this optional, innovative configuration can only be found from Allmand.

**Compact.** When retracted, fixtures don't hang off the back of the chassis. **Easier, Safer to Store, Ship and Tow.**

**Easy Setup.** Mast is always in upright position and fully deploys or retracts in only 30 seconds. **Quick Operation. Simple Adjustment.**

**Flexible.** Lights operable at any height. Exclusive light bar allows wider range of fixture adjustment. **Light Exactly Where You Want. Reduce Glare.**

SHO-HD

**BRIGHTER-BETTER COLOR-MORE COVERAGE**

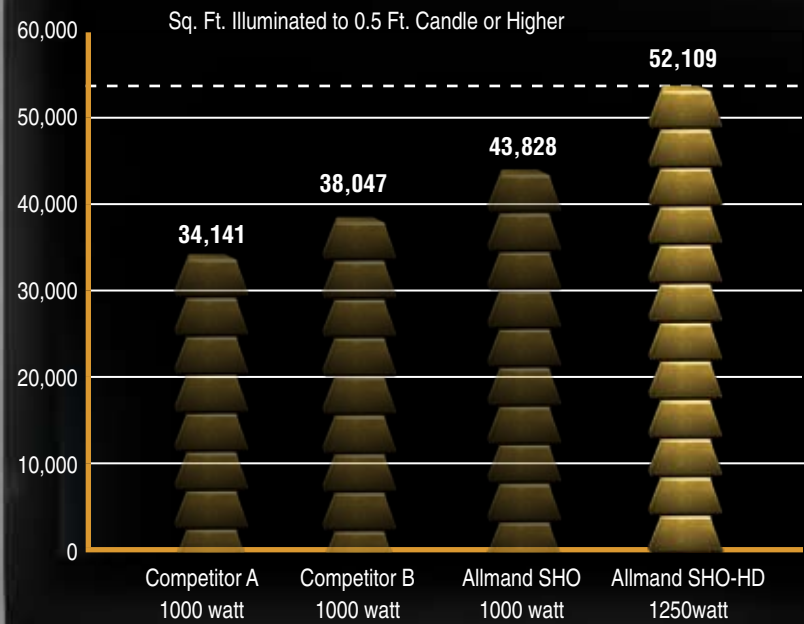

Allmand's SHO-HD light fixtures feature the most advanced lighting technology available on the market today. SHO-HD fixtures are standard on all Allmand light towers.

**Brighter.** Each 1,250-watt lamp produces an unequaled 150,000 lumens – a 36-percent increase over standard 1,000-watt lamps. **Delivers Consistent, Even Light.**

**Better Color.** With a color rendering index of 70, SHO-HD lamps offer a whiter light, closer to that of real sunlight. **Enhances Visibility for Detail Work.**

**Coverage.** Illuminates up to 52,000 square feet of surface area to ½ footcandle or brighter. That's a 20- to 45-percent increase over competitive lamps. **Cover More Area With Less Lights.**

**Since introducing the first portable light tower in 1954, Allmand has been the industry's leader in lighting equipment technology.**

We were the first to offer parallel lamp fixtures to deliver better light output...the first to introduce brighter SHO light fixtures...the first to develop light sequence control for hands-free operation...and the first, and only, to offer SHO-HD light fixture technology, the brightest light available with the best coverage.

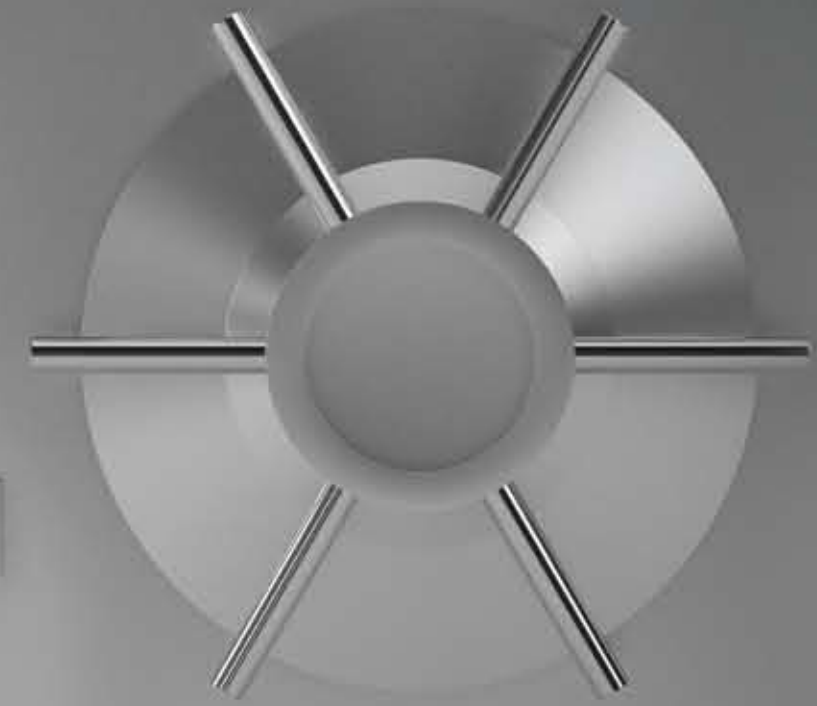

But being the light leader is more than innovations — it's about offering a complete line of solutions. And with the most diverse offering of equipment and options available, we provide the right combination of features to cater to virtually any application demand or user preference.

And having this right combination means you can achieve a greater return on your investment. Whether you're a rental center enjoying the benefits of increased utilization and longer service life, or an enduser expanding the workday, simplifying the job and getting more performance with fewer light towers - Allmand is sure to unlock your ROI.
