

VERSATILE. PROFITABLE. CUSTOMER PROOF.

NOT EVERY TLB IS BUILT FOR RENTAL.

A new dedicated 4-wheel drive • Digging depths ranging from 8'4" to 9'10" • Five additional 2-wheel drive models - 20 to 35 hp

Taking it easy on equipment isn't part of your customer's job. That's why Allmand TLBs feature an exclusive Extended Service Life (ESL) design with easy-access service ports for simple maintenance. Heavy-duty components and the prevention of metal-to-metal contact provide added durability to keep the machine running, rented and making you money.

Boost your profits with the performance of a TLB your customers will be renting again and again. ROI doesn't come by chance. It comes from the assurance of Allmand.
