Critical Correction - Action & Response Required Immediately	<input type="checkbox"/>
Action Required - Fix, No Report	<input type="checkbox"/>
If Encountered - Correct If Issue is Found	<input type="checkbox"/>
Information Only	<input checked="" type="checkbox"/>

Authorized Labor Charges For This Bulletin: No Labor & No parts
Part Numbers Required To Correct This Bulletin: Kit Part Number 124437

**Description or Summary of Improvement:**

The 20 amp glass fuse between the regulator and starter has been upgraded to a different style of fuse. The new style fuse will help with less movement when vibration occurs. This also helps to reduce the amount of failures with the old style fuse.

**Correction and Instructions:**

Remove the old assembly by disconnecting the wires from regulator to the starter. Replace with new wire and fuse holder from kit 124437. Follow the instructions and schematic that come with kit 124437.
